SUMMARY

Experienced IT professional with a broad knowledge of hardware, software, and networking technologies. Proficient in database design and development, software design, programming and debugging. Experienced in teaching classes and training a variety of people in various settings.

TECHNICAL SKILLS

- **Programming:** ASP.NET, C++, C#, HTML, CSS, PHP, JavaScript, jQuery, JSON, XML, XSLT
- **Software:** Visual Studio, SQL Server, MySQL, SharePoint, Microsoft Office, Adobe Creative Suite, Expressions, Contribute, VMware, GIT, IIS, Apache, Tomcat
- **Operating Systems:** CentOS, Windows 2000/XP/Vista/7,8, Windows 2000/2003/2008 Server, OS X
- **Networking:** Active Directory, Novell, Citrix, LAN, WAN, TCP/IP, WINS, DHCP, DNS, Cisco IOS, VLAN, Routing Protocols (OSPF, EIGRP, IGRP, RIP), ACL implementation, VPNs
- **Hardware:** PC's, MACs, smart phones, firewalls, routers, switches, NAS, printers, scanners, projectors

EMPLOYMENT HISTORY

Syracuse University Libraries, Syracuse NY

2/2014 - Present

IT Analyst/Programmer

- Planned, customized, developed, designed and tested library web applications in LAMP environment.
- Installed, evaluated, implemented, and customized open source web software.
- Created system and software documentation as needed for new and existing systems
- Recommend changes to existing systems and implement new systems as needed.
- Reviewed requests for system modifications and analyzed the complexity, scope, and feasibility of implementing the changes.

Bryant & Stratton College, Liverpool, NY

5/2010 -3/2014

Part-time Evening Adjunct Instructor in Networking Technology

Responsible for teaching students in a hands-on computer lab environment that prepares them for A+, Network+, Cisco and Microsoft certifications. Examples of skills taught to them include:

- Installing, configuring, troubleshooting, and securing networks.
- Managing users and sharing resources.
- Working with network and routing protocols.
- Researching, evaluating, recommending and specifying hardware and software components and complete systems for enterprise needs.

Loretto, Syracuse, NY

10/2012-2/2014

Analyst/Programmer

- Analyzed user requests to determine parameters of required program and if a new program must be created or if an existing program can be modified.
- Designed, coded, tested, maintained and documented complex programs based on user requests.
- Built complex user interface applications and back-end databases using various web development tools, programming languages and scripting languages.
- Prepared user and technical documentation for implementation and support.
- Analyzed and documented user information needs or business problems and determined most effective/efficient programming solutions.

Falk College of Sport & Human Dynamics, Syracuse NY

3/2006 – 10/2012

Computer Consultant

- Designed, programmed and supported college website using ASP.NET, C# and JavaScript.
- Built forms that would gather recruiting information and assist in scheduling classes.
- Created master pages to speed up development of web site.
- Wrote and modified databases that utilized SQL.
- Organized and instructed group training sessions on a variety of applications.
- Administered Microsoft Windows Servers (Active Directory), Novell Servers and Microsoft Workstations

Bryant & Stratton College, Liverpool, NY

4/2001 -3/2006

Technology Coordinator

- Setup and managed Windows2003/XP, Novell NetWare and Peer-to-Peer networks
- Implemented Active Directory and Citrix environment for college
- Lead group training sessions on various software applications with faculty and staff
- Developed and implemented backup recovery systems using programs such as ArcServeIT and Norton Ghost Enterprise
- Established and maintained network users and security
- Loaded and updated application software such as Oracle Applications, Office 2003/XP, and virus scan software
- Managed inventory of hardware and software, including licensees
- Maintained vendor relations

CC Plus, N. Syracuse, NY

8/1999 – 4/2001

Computer Consultant

- Designed, created and modified web pages using HTML, Java, PHP, MySQL and programs such as Macromedia Flash, Adobe Photoshop and Dreamweaver
- Created databases and applications in Access and Visual Basic that utilized SQL
- Setup web servers and RAS servers using Windows 2000/NT and IIS 4.0/5.0
- Installed and configured routers and firewalls

EDUCATION

Bellevue University

MS-Management of Information Systems, 2010

-Information Security Concentration

CERTIFICATIONS

Cisco Certified Network Associate (CCNA) (Expired 2014)

Security + (Expired 2014)
